IBEX 2024 INNOVATION AWARDS WINNER

PHIBER® SYSTEMS

PHIBER®
DOCUMENTATION

Product Registration Form

Routine Freshwater Maintenance and preservation mitigates corrosion, biofouling and scale buildup, extending the service life of both systems and materials used in raw water networks, significantly reducing operating costs and increasing intervals between services.

This document and any proposed representations of a PHIBER System are not intended to supersede any marine industry practices, standards, or common sense. All disciplines referenced in this document are set forth by the American Boat & Yacht Council (herein referenced as “ABYC”) and supersede any other installation methods.

Warranty Registration & Activation

PHIBER Systems are warranted against manufacturer workmanship and material defects for two years from the date of purchase. The warranty applies to both the Control Module and the FWF Manifold. The installer is solely liable for proper installation of the System. For any warranty service to be obtained, the installation must be documented by a PHIBER-certified installer, and provided to PHIBER Systems, LLC .

A completed copy of this form along with any photos of the FWF Manifold, Hydrostatic Lock, Control Module, Junction Module, and FWF pump must be sent to the following EMAIL address:

WARRANTY@PHIBERSYSTEMS.COM

Submissions can also be made via the online product registration section located at the OEM Support page:

WWW.PHIBERSYSTEMS.COM/SUPPORT

Once received and reviewed, a confirmation and warranty activation email will be sent to both the Owner and Installer. The full warranty can be downloaded at PHIBERSystems.com

PRODUCT REGISTRATION FORM

Affidavit

As the installer of the PHIBER System described herein, I do certify that I have completed the installation described above in strict accordance with the standards provided by the American Boat and Yacht Council (ABYC) as they pertain to electrical wiring (E-11) and hull piping (H-23). I certify that I have installed, programmed and tested the PHIBER System in compliance with the PHIBER System documentation provided with the System on the particular vessel described in VESSEL INFORMATION section of this form. I have NOT altered the PHIBER System components, and I have fully programmed the Control Module in accordance with the limitations and safety of the Systems onto which they are installed.

FOR ALL YOUR VOYAGES AHEAD

Flush-o-Pedia
Flush-o-Pedia is a compilation of seawater science, chemistry, and all about flushing maintenance for marine systems, including the philosophy and mechanics of raw water networks, freshwater systems, and the individual technologies used to create them.

PHIBER Training & Education
PHIBER Qualified Installer Training (St. Augustine, FL) introduces design, modification, and integration of PHIBER Systems into existing or new raw water networks.
